OBJECTIVE

Motivated and detail-oriented Computer Science Engineering student with strong foundations in software development, full-stack web technologies, and problem-solving. Skilled in Java, Python, Spring Boot, Next.js, and database management, with hands-on experience building scalable applications and AI-driven systems. Passionate about developing innovative real-world solutions and seeking an opportunity to contribute to impactful projects while continuously enhancing technical expertise.

EDUCATION

NMAM Institute of Technology, Nitte	2023 – 2027
Bachelor of Technology (B.Tech) in Computer Science and Engineering	CGPA: 8.17
Sri Vidhyabharathi PU College, Shivamogga	2021 – 2023
Pre-University (PCMB)	Percentage: 89.5%
Sri Someshwara Vidyalaya, Davangere	2021
SSLC	Percentage: 91.2%

WORK EXPERIENCE

Remote Intern India Space Lab	Jun-July 2025
• Worked on CubeSat and CanSat missions involving PCB design, simulation, and testing. • Gained practical exposure to embedded systems, circuit design, and aerospace technologies. • Collaborated in a remote technical environment while improving problem-solving and research skills.	

PROJECTS

AI Surveillance Dashboard - Object Detection System	<i>Tech Stack: React.js, Python, Tailwind CSS</i>
• Developed a real-time AI surveillance dashboard for live object detection and monitoring using YOLOv8 and OpenCV with optimized video streaming. • Built an interactive analytics dashboard with WebSocket-based real-time updates.	
Event Registration System – Web Application	<i>Tech Stack: Node.js, Express.js, HTML, JavaScript, Tailwind CSS</i>
• Developed a full-stack event registration platform with REST APIs for event management, participant registrations, and seat tracking. • Built a secure admin dashboard with CRUD operations, validation mechanisms, and a responsive Tailwind CSS interface with dark/light mode support.	
AI Crowd Control System - T3 Stack Application	<i>Tech Stack: PostgreSQL, Next.js, TypeScript, tRPC</i>
• Developed an AI-based crowd monitoring system using real-time object detection to improve public safety • Implemented YOLOv8 with optimized data pipelines for detecting crowd density and potential threats.	

TECHNICAL SKILLS

- **Languages:** C, C++, JavaScript, TypeScript
- **Frontend:** HTML, CSS, Tailwind CSS, React.js, Next.js
- **Backend:** Node.js, Express.js, Spring Boot
- **Databases:** MySQL, MongoDB
- **Tools:** Hibernate, Spring Data JPA, Maven, Git, GitHub

EXTRACURRICULAR ACTIVITIES

- **Core Member** – SAMVAADA Club, involved in social media handling, event promotions, and campus event coverage activities.
- **Core Member** – FLC (Finite Loop Club), actively participating in coding activities, technical discussions, and problem-solving sessions.
- Interested in Editing Videos, Cricket, Gaming, and exploring new technologies.
